

Pulper START / STOP Procedures

To Start Pulper

1. Close Drain On Silversaver (If Equipped)
2. Turn Power ON
3. Release **STOP** Lever On Stop Button.
4. Press **START** button to close drain and start the pre-fill cycle.
5. Push Green **START** Button. (After Pulper Fills the green light will illuminate)

If unit will not pre-fill, check to ensure lid is properly closed and that the start button was pressed to close the drain and start the pre-fill cycle.

To Shutdown Pulper

1. Stop Feeding Waste Into Pulper For 15 Minutes. (Continue Running it)
2. Press BLACK '**Timed Stop**' pushbutton on remote pushbutton station or on panel door (if equipped). (Pulper Will Time-out / Shutdown)
3. Lock in **STOP** Button with latch.
4. Open Pulper Tank Drain by pressing the BLACK drain pushbutton on the panel door. Pulper will drain.
5. Open Silversaver Drain. (If Equipped)
6. **Turn Power OFF.**
7. Clean Pulper and Extractor with a brush and Hot Water.

Always Turn Power Off Before Reaching Into Pulper
