

somat®

Remote Waste Pulping System

Description

Standard SOMAT Model D-10 table mounted disposer, 18" stainless steel diameter bowl with disposer saver, 3 or 5 HP slurry pump, valve package, Som-A-Trol® control panel, push button station

Benefits

- Up to 80% volume reduction
- Reduced labor cost
- Better sanitation
- Water conservation
- Improved operator morale

Operation: Foodservice waste enters the disposer via the bowl where it mixes with water, is processed and made into a slurry. The slurry, consisting of 5% solids and 95% water, is automatically transported through a pipeline to the Hydra-Extractor®, where water is removed and the resultant semi-dry pulp is discharged into a haul-away container. The extracted water is recovered and returned to the pulping tank for re-use.

Somat equipment provides an economic and efficient answer to cutting the high and ever increasing costs associated with waste handling. Manufactured by Somat Company of Lancaster, Pennsylvania, originators of waste pulping systems and specialists in waste reduction technology.

Approval:

Item No _____

SOMAT Model: **D-10 Disposer**

Technical Specifications

Disposer: 10 HP disposer, 15" diameter rotor turntable with exclusive 2 piece design and 10 internal impact breakers constructed of hardened ductile steel alloy. Matching sizing ring with 40 grind teeth constructed of hardened ductile steel alloy. Exclusive 8 1/4" throat opening to allow for faster feeding. Flexible neoprene collar to eliminate vibration and increase ease of installation. Versatile low body of offset grind chambers with force feed directional deflectors. Bolt on grind chamber allows replacement of all wearing parts without disturbing plumbing and electrical connections. Bolt on discharge flange for easy removal. Adjustable legs to level disposer and meet drain stub. Bolt on "Continuous Duty" motor for easy removal. Exclusive shaft extension with 3/4" wrench flats to externally de-jam foreign matter with special tools. Heavy cast alloy construction providing an extra long life disposer

Valve Package: Prepiped valve package assemblies to include all valves required for proper operation.

Som-A-Trol® (Electrical Control Panel): UL approved, Includes all necessary power, control and water level components prewired to a terminal strip. Push button station in a NEMA 4 stainless steel enclosure

Options Available:

- 8 1/4" sink adapter with disposer saver
- Special electrical characteristics

Electrical Characteristics: 208/230/460 volt, 3 Phase, 60 Hertz

Capacity: 600 pounds per hour of food waste only.

Finish: All exterior surfaces, except where polished stainless steel, are prime coated and finished with two coats of enamel paint.

Equipment only is supplied by SOMAT Company; installation, piping and wiring not included.
